

# Alivia International Foundation

## Activity Report for the year 2022

### 1. Incorporation, registration, ANBI status

**Alivia International Foundation was incorporated on 10th of June 2022** before Mr. G.P. Mounier, deputy civil law notary, in the capacity of custodian of the vacant protocol of Mr. A.A. Voorneman, formerly civil-law notary in Amsterdam.

Due to the mistake in the name of the organisation, on the **4th of August the deed of amendment** was executed before Mr. G.P. Mounier, deputy civil law notary.

On the **16.06.2022 the organisation was registered** in Business Register by the Netherlands Chamber of Commerce.

The organisation **defined it's Vision, Mission, Values** and prepared: webpage of the organisation ([www.alivia.org](http://www.alivia.org)), mailbox [info@alivia.org](mailto:info@alivia.org), [Governance Policy](#), [Policy Plan](#), [Remuneration Policy](#) and self assessment of meeting ANBI criteria. **The organisation applied for ANBI status and was granted it on 3rd October 2022.**

### 2. Office

The organisation **opened bank accounts on 10th of October 2022** and started full operations.

**Vendors for accounting services, virtual office services** and other needed services were chosen and **agreements for the cooperation were prepared and signed.**

### 3. Legal

The **agreements between Alivia National Organizations (ANO's) and Alivia International Foundation for the donations and loans** were prepared, consulted with the leaders of local ANO's and signed.

### 4. Mission execution

**The organisation prepared the Action Plan for 2022** and started executing it.

**In 2022 AIF efforts were concentrated on supporting Alivia Spain in launching first projects supporting cancer patients, their families and carers:**

[www.Oncoindex.org/en/spain](http://www.Oncoindex.org/en/spain) – educational portal which was created to **support patients in situations of limited access to medicines that should be reimbursed**. It is also a tool to awaken social awareness – the index value is to be interpreted as a clear sign for decision makers: the level of cancer medicine reimbursement definitely has to improve.

Oncoindex is the source of knowledge about reimbursement of modern pharmaceutical therapies for as many as 20 different types of cancers. We analyse therapies which were granted marketing authorisation by the European Medicines Agency (EMA) in the past 15 years and then were recommended by the European Society for Medical Oncology (ESMO). We do our best to provide practical knowledge and show the situation of patients, who should be entitled to treatment in accordance with current medical knowledge. It does not mean that by definition we consider the previously registered medicines to be less effective; in certain cases they remain optimal therapies. However, we wish to clearly state that patients should have access to all medicines that are recommended by international standards.

**Cancer knowledge base** – What can be done to avoid getting cancer? What are the symptoms of cancer? A **reliable source of knowledge about cancer** is essential in prevention and during the fight against the disease. Alivia is publishing crucial information about the newest methods of cancer treatment and diagnostics. Although the news are usually on expert level, for many patients they can be a life-saving breakthrough.

**Social campaigns presenting Oncoindex results and problems of limited access to cancer therapies in Spain** – to improve access to cancer therapies the society needs to understand problems of cancer patients and importance of access to optimal therapies. Therefore – awareness campaigns need to be presented to the public. Alivia Spain was running awareness campaigns through social media channels, PR activities and on-line marketing campaigns.

**Alivia International Foundation was also supporting Alivia Spain in starting fundraising activities** by acquiring regular donors and corporate donors.

**The budget for the Network and AIF the year 2022 was prepared and executed** with some minor amendments. The **donations and loans for Alivia Spain were transferred to maintain the costs of adopting and launching projects supporting cancer patients, awareness campaigns and fundraising activities.**

**To manage the coherence and integrity of values, mission execution and share the best**

**practices the Alivia International Foundation created Fundraising global guidelines and Communication global guidelines for all local Alivia's.**

Periodical meetings were held **with leaders of Alivia's National Organizations** about development, current issues and advocacy subjects. **The monthly financial and performance monitoring was executed.**

#### **4. Planning for the year 2023**

The organisation **prepared a budget for Alivia Netherlands** for 2023, and **approved budgets of Alivia Poland and Alivia Spain.**

**The operational plans** for all organisations were prepared and approved.
